

Vital HF™ Next Generation

Vital HF – Next Generation Extra Nutrition Where You Need it Most

Scientists say that the rich Humic Acid in Vital HF's patented formula offers many missing links for optimal health. Vital HF is an all-natural substance that has been extracted from ancient deposits of decomposed organic matter and refined for human use as a dietary supplement.

Traditionally used as a remedy for a wide variety of illnesses, modern studies show Humic Acid to support immune function and have powerful anti-viral and detoxifying properties.

- Rich source vitamins, minerals and a synergistic blend of multiple herbal immune system boosters.
- Powerful free-radical scavenger and natural antioxidant.
- Increases absorbability of minerals with fulvic acid, a component of humate.

- Detoxifies the body. Attracts, attaches and removes toxins as waste.
- Stimulates “good” microbes while suppressing “bad” microbes for enhanced digestion.
- Supports the immune system by assembling the sugars that regulate and balance the immune system.

“Unfortunately, many people have immune system challenges whether it be common or more complex, chronic health issues. In this improved formula we have added vitamins, multiple herbs and additional minerals to the original great formula for the sole purpose of supporting and strengthening the immune system.”

Sharon Wollard, Product Specialist Health & Home
