ONE-COAT ROOFING SYSTEM

PUMA FAST

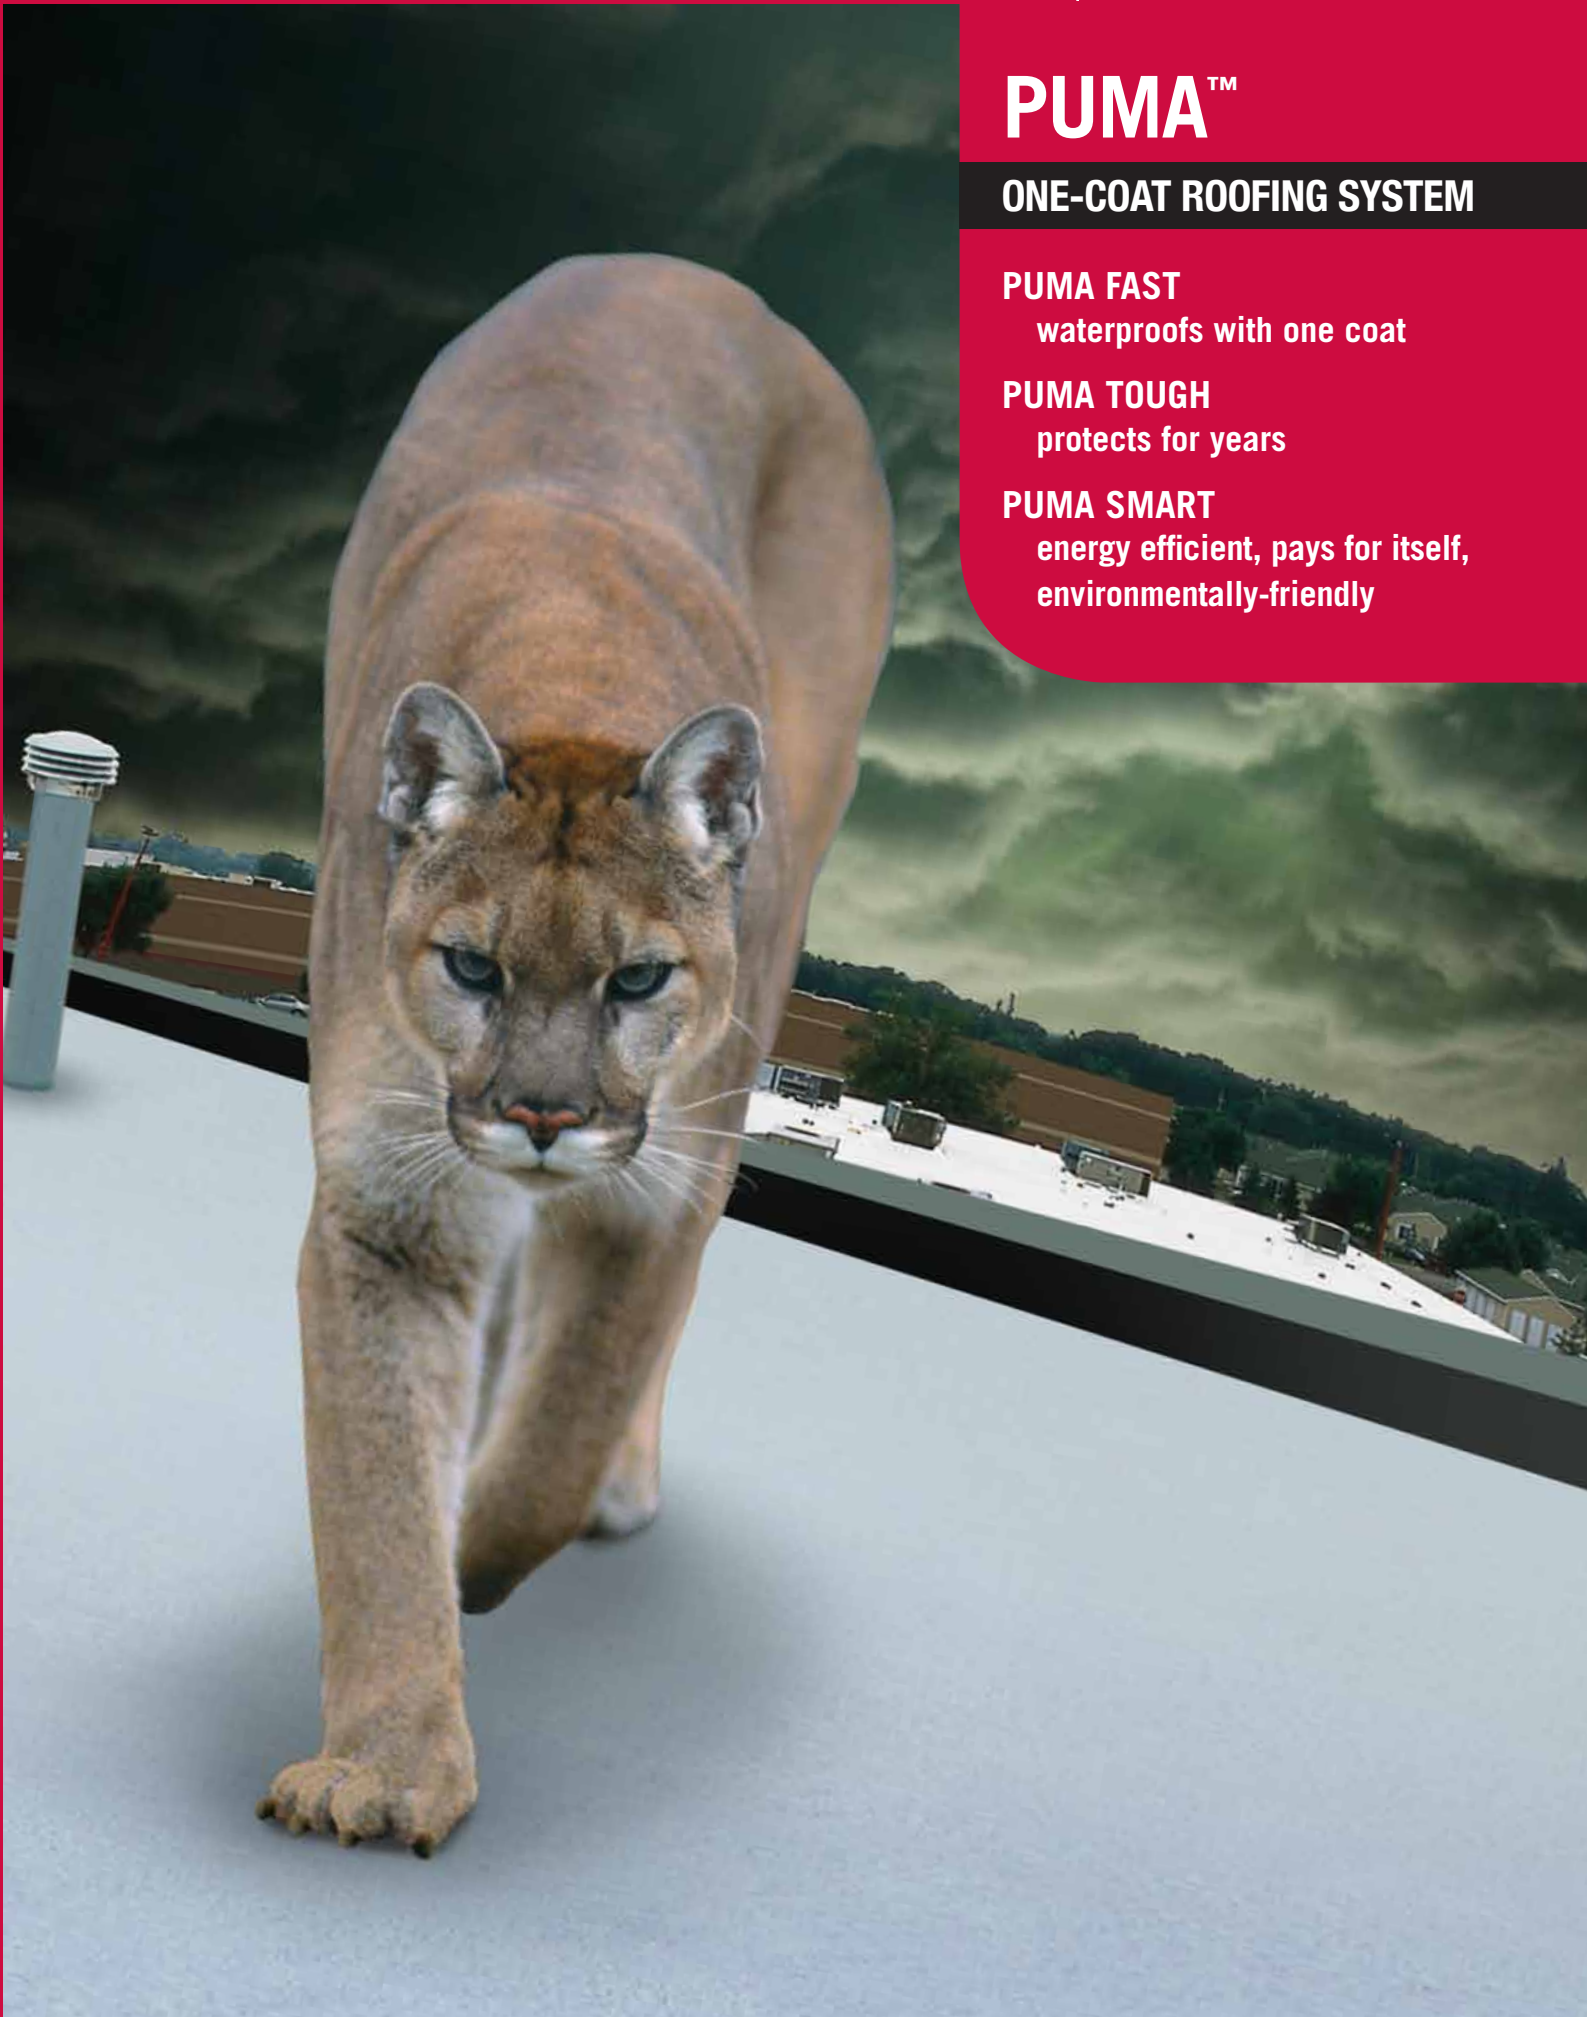

waterproofs with one coat

PUMA TOUGH

protects for years

PUMA SMART

energy efficient, pays for itself,
environmentally-friendly

PUMA™

Conklin's premium ONE-COAT roofing system

Fast. Tough. Smart. That's PUMA, Conklin's breakthrough roofing system. And that's why you'll choose PUMA to protect your buildings, their contents and your investment.

- Fast** - waterproofs with one coat
- Tough** - protects for years
- Smart** - energy-efficient, pays for itself, environmentally-friendly

PUMA roof coating leaps ahead of current acrylic technology to set tough, new standards of performance, extended roof life and cost-effectiveness. PUMA's (Poly-Urethane Modified Acrylic) polymer technology breaks all the rules to make the industry's first and only one-coat roofing system.

PUMA fast - waterproofs with one coat

Fast drying time means earlier protection from moisture, dirt.

One coat means shorter installation time and minimal disruption of traffic/parking at your building.

PUMA tough - protects for years

Three times the erosion resistance of conventional acrylic roofs, PUMA promises many years of protection.

PUMA sticks, grips and holds fast.

PUMA smart - energy-efficient, pays for itself

On average, our customers save enough on utility costs to realize a complete return on their investment in 4-7 years. PUMA's white surface reflects 85% of the sun's heat to keep roofs cool and your air-conditioning expenses down.

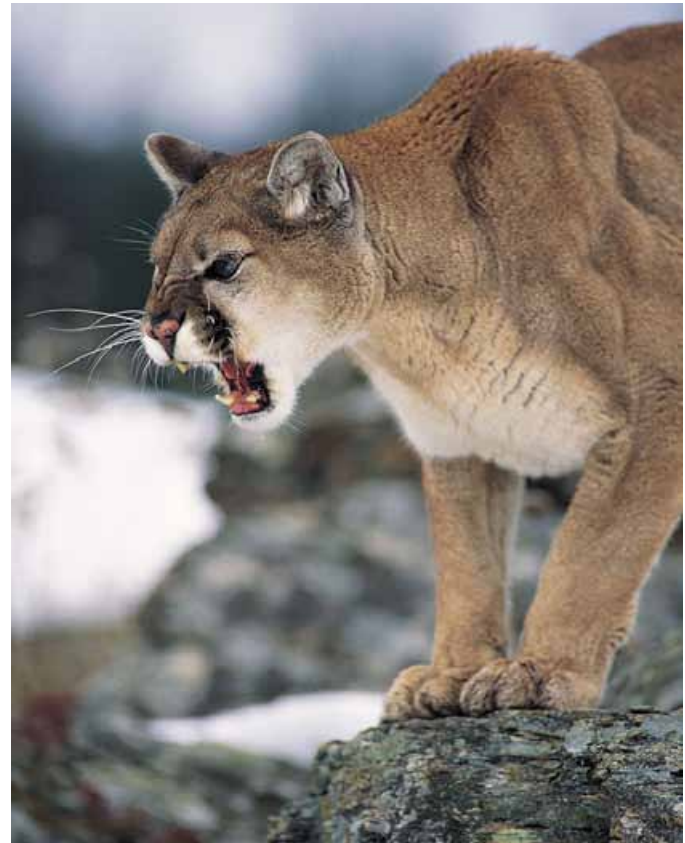

PUMA green - environmentally-friendly

- Low VOC emissions (<50 g/L)
- Water-based formula ensures a safe job site and solvent-free cleanup.
- PUMA is eligible for LEED credits.

Product Description

PUMA, Poly-Urethane Modified Acrylic, is an advanced technology, premium roof coating. It combines the best performance of urethane and acrylic polymers to create a seamless membrane.

PUMA's one-coat, patent-pending technology is tougher and more durable than conventional acrylic roof coatings and is specially designed for new spray-in-place polyurethane foam (SPF). Compare to industry standards and you'll see that PUMA has outstanding tensile strength AND excellent elongation, which give your roof both long-term flexibility and resistance to deterioration from the elements and foot traffic. Its superior resistance to dirt pickup and mildew keeps your roof looking new and reduces maintenance costs for years to come.

Warranties

We extend our optional warranty programs for your new Conklin PUMA Roofing System with confidence. Both limited material and manufacturer-backed labor and material warranties up to 15 years are available. Contact your independent Conklin roofing contractor for more information.

More About Conklin

Developed by Conklin's R&D group, PUMA is the latest in a series of innovations for the roofing industry. Conklin was one of the very first companies to develop and manufacture white, energy-efficient roofing systems in the 1970s. Over thirty years, two billion square feet of roofing applied and thousands of satisfied customers later, Conklin has built a sterling reputation for delivering the best.

PUMA is listed under UL 790 Class "A" Fire Rating
