

## New Life For an Old Roof

Conklin's been in the innovation business since 1977, when we formulated the first acrylic roof coatings. Now we're taking our innovation to new heights by offering a complete waterproofing system for aged TPO (Thermoplastic Olefin), PVC (Polyvinyl Chloride) and CSPE (Chlorosulfonated Polyethylene) roofs that can improve and extend the life of an existing single-ply roof. As TPO and other single-ply membranes become weathered, rooftops can crack, leak, and pick up dirt, diminishing their effectiveness and energy-saving properties. Conklin's elastomeric coatings provide a new, cost-effective solution for repairing and preserving approved single-ply membranes, resulting in improved energy savings.

**An approved single-ply membrane restored with a Conklin Roofing System will deliver all these benefits for years to come:**

- Stops leaks with superior waterproofing.
- Increases energy efficiency and lowers utility expense with its cool, white, reflective surface.
- Extends the life of your existing roof.

Recommended for application over these surfaces:

- Aged TPO (Thermoplastic Olefin) membranes
- Aged PVC (Polyvinyl Chloride) membranes
- CSPE (Chlorosulfonated Polyethylene) membranes

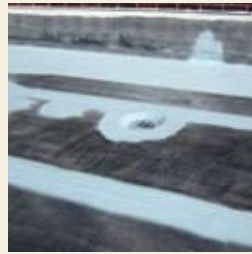

# Professional application of a Conklin Single-Ply Recoating System\*

1. Power wash and clean with Wac II Roof Cleaner

2. Prime surface with Tack Coat Single-Ply membrane primer.

3. Reinforce seams with Spunflex® imbedded in Rapid Roof® III or Equinox® Base Coat.

4. Seal entire roof with Rapid Roof® III or Equinox Top Coat.

\*See Product Specifications for current pull-test requirements.

## A Conklin white roof is the smartest way to stay in the black

### Recoup your costs

A great return on investment is another important reason to choose Conklin's Single-Ply Recoating System. Many satisfied customers discover that a Conklin roof pays for itself during the warranty period in lower air conditioning costs. Federal tax rebates, tax credits and deductions may also offset your investment. In many cases, the government considers recoating a procedure that can be deducted as a maintenance cost. Check with your local utility company, tax advisor, and [www.energystar.gov](http://www.energystar.gov) for additional details.

### Look forward to years of trouble-free protection, low maintenance

Conklin Roofing Systems provide leak-free protection and exceptional energy savings for years, often exceeding the warranty period. They maintain maximum reflectivity and energy savings because their surfaces are resistant to dirt and discoloration. Annual or bi-annual cleaning is all that's needed to keep them white.

*When applied over fully-adhered Single Ply Systems, Conklin's Single-Ply Recoating system carries only a material warranty; otherwise, both joint and material warranties are available.*

### Eliminate future roof tear-offs

Years from now, when it's time to renew the superior protection of your Conklin roof, a simple recoat will do the job. In most cases, multiple recoats can be done for the entire life of your roof, saving you the expense of a new roof. With your recoat, our material warranty may also be extended several years. Your Conklin Roofing Contractor will inspect your roof and advise you of the best way to restore the protective envelope of your building.

### Enjoy peace of mind with our Warranty Program

Conklin's optional warranty program includes a non-pro-rated material warranty.
