

Conklin MR System[®] for Metal Roofs

"We live in an area where the temperatures range from 25° below to 100° above zero, so the roof has a lot of movement and weather related stress. This process sealed our leaks, stopped the rusting and allows our students and staff to stay dry. We didn't know we were going to get increased energy efficiency when we started, but we are spending less to cool the building. We are going to have more of our buildings done with the MR System."

Keith McMann, School Superintendent

Don't Replace Your Roof - Restore It!

Conklin's highly-reflective roof systems have been providing quality solutions to the roofing market since 1977.

Learn more about Conklin Roofing Systems by contacting the Conklin Contractor below for a roof inspection and a quote.

"The roof of our building was deteriorating with rust. Installing the Conklin MR roofing system extended the life of the roof. After installation we now enjoy a dry building. We also like the annual inspection as part of the Conklin warranty. It has been a good investment."

Bill Ressler, Owner
Kidron Electric Inc.

Save money by saving energy

The highly-reflective coating also provides significant energy savings. By reflecting up to 85% of the sun's ultraviolet energy rather than absorbing it in the form of heat, Conklin ENERGY STAR roof coatings can drastically reduce cooling costs. The benefit can also be felt in a cooler workspace.

Our three exceptional roof coatings are designed to meet the needs of your particular project:

- Benchmark® offers the ultimate in flexibility and strength
- Rapid Roof III® is the workhorse of the Conklin line
- Rapid Roof HV delivers Conklin quality without the costly code approvals and fire ratings

Tested. Proven. Trusted.

Conklin Roofing Systems have been tested, proven and trusted by building owners nationwide since 1977. Our systems are tested and approved by major code approval agencies, such as Factory Mutual (FM) and Underwriters' Laboratories (UL). Architects, specifiers, building owners and facility managers around the country rely on Conklin Roofing Systems to protect the valuable contents of their buildings.

Affordable quality

Conklin Metal Roofing Systems are designed to provide long-term performance at a fraction of the cost of metal replacement. Additionally, there are financial benefits to metal roof restoration systems. Metal roof restoration can be expensed as a repair or maintenance cost while roof replacement must be capitalized.

Metal Roof System Application

What is Metal Roof Restoration?

A complete waterproofing system for metal roofs that inhibits rust, stops leaks and provides an energy efficient, long-lasting and attractive finish coat for years of service. All seams are strengthened with fabric reinforcement embedded into our acrylic elastomeric roof coating. Exposed fasteners are sealed from the elements with premium caulking. The entire roof surface is protected with one of Conklin's industry-leading roof coatings. The system is an effective method for preserving an existing metal roof without the need for costly metal repair or replacement.

What can this System do for you?

- Stop leaks at seams where they most occur
- Extend the life of your roof
- Overcome metal design flaws
- Reduce air conditioning costs

Prevents leaks

The Conklin MR System™ protects your metal roof from the elements with a highly-durable, seamless membrane. Stops leaks where they occur most by sealing all seams, fasteners and penetrations with a combination of the best acrylic elastomeric coatings on the market, strengthened with fabric reinforcement. This ensures that the elements cannot get to your most valuable items.

Extend your roof's life

Conklin's MR Systems offer additional benefits beyond stopping leaks and inhibiting rust. Conklin highly-reflective roof coatings reduce the destructive thermal shock experienced by metal roofs during extreme fluctuations in temperature. This minimizes the amount of expansion and contraction experienced by the roof and greatly increases its useable life.

1 Power wash and clean with Rust Off®.

2 Prime with Metal Ready® Universal.

3 Kwik Kaulk® all fastener heads.

4 Reinforce existing seams with Spunflex® or Butyl Tape and base coat.

5 Seal entire roof with one of our approved acrylic coatings:
 • Rapid Roof® HV • Bench Mark®
 • Rapid Roof III® • PUMA® XL
 • Equinox®

6 Completed project.
