

## Stop leaks, energy loss from the top down

Conklin's SPF System is a totally seamless barrier that insulates and waterproofs your roof to save energy costs. A Conklin Contractor will systematically address, repair and reseal each problem area that is leaking before sealing the entire roof with the SPF System.

Conklin's SPF System will deliver all these benefits on a new or restored roof for years to come.

- Stops leaks.
- Increases energy efficiency and lowers utility expense with a cool, white, reflective surface and an insulation value of R-6 per inch of thickness.
- Stops lateral water seepage with the foam's closed cell structure.
- Simplifies repairs - most damage can be fixed with caulk gun and sealant.
- Extends the life of your roof.

### SPF Foam insulates interior walls, too

Seal your entire building's energy envelope by applying Conklin's SPF System to your roof AND interior walls. This will multiply the insulation benefits of a restored roof and add strength to your building.

Recommended for application over these surfaces:

- EPDM/BUR/Mod-Bit
- Concrete
- Metal
- Wood
- Composite Decking
- Interior Walls and more

# Professional application of a Conklin SPF Roofing System

1. Prepare roof surface by removing all loose gravel and debris.

2. Apply SPF with a minimum thickness of one inch.

3. Coat foam surface with appropriate Conklin coating system.

## A white Conklin roof is the smartest way to stay in the black

### Reduce cooling expense by up to 30%

The average roof absorbs a large portion of the sun's ultraviolet rays as heat. Conklin's white SPF roofing system reflects 84% of the sun's heat, cooling your building and saving you as much as 30 percent in air conditioning costs.

### Recoup your costs

A great return on investment is another important reason to install Conklin's SPF Roofing System. Many satisfied building owners discover that a Conklin roof pays for itself during the warranty period in lower air conditioning costs. Federal tax rebates, tax credits and deductions may also offset your investment. Check with your local utility company, tax advisor, and [www.energystar.gov](http://www.energystar.gov) for additional details.

### Look forward to years of trouble-free protection, low maintenance

Conklin SPF Roofing Systems provide leak-free protection and exceptional energy savings for years, often exceeding the warranty period.

They maintain maximum reflectivity and energy savings because their surfaces are resistant to dirt and discoloration. Annual or bi-annual cleaning is all that's needed to keep them white.

### Eliminate future roof tear-offs

Years from now, when it's time to renew the superior protection of your Conklin roof, a simple recoat will do the job. In most cases, multiple recoats can be done for the entire life of your roof, saving you the expense of a new roof. With your recoat, our material warranty may also be extended several years. Your Conklin Roofing Contractor will inspect your roof and advise you of the best way to restore the protective envelope of your building.

### Enjoy peace of mind with our Warranty Program

Conklin's optional warranty program includes a non-pro-rated material warranty.

#### Testing & Approvals

Conklin is a member of National Roofing Contractors Association (NRCA), Spray Polyurethane Foam Alliance (SPFA), a division of the American Plastic Council, E.P.A. Energy Star® and the Cool Roof Rating Council (CRRC). Our products meet or exceed the standards set by these organizations.

Conklin is a charter member of the Energy Star Program. Our products meet criteria established by EPA/DOE for energy efficiency and reflectivity.

Meets requirements of reflectivity and emissivity for inclusion in the CRRC program.
