

CONKLIN®

AXIS® Gear Oil Conditioner

Newly reformulated to better treat **ALL** gear oils

Improved Axis Gear Oil Conditioner maximizes performance by fortifying gear oils, supplying the necessary additives to protect and extend gear life. Axis includes extreme pressure additives that protect gears against wear, scoring and shock loads. It reduces friction which allows gears to operate smoother, quieter and cooler.

Add Axis to:

- Provide additional anti-wear and extreme pressure protection
- Increase resistance to oxidation
- Improve thermal stability
- Provide anti-corrosion protection
- Extend the life and durability of gear oils
- Provide additional pour point depressant
- Offer strong foam suppression

Axis is compatible with all commonly used seal materials, automotive, and industrial gear oils.

You need the added protection of new Axis for greater thermal stability and wear protection.

Axis Gear Oil Conditioner
