

Joint Support™ Next Generation

Fast Facts

- An estimated 40 million people in the United States have arthritis or other rheumatic conditions. By the year 2020, this number is expected to reach 59 million.
- Rheumatic diseases are the leading cause of disability among adults age 65 and older.

Joint Support Next Generation Extra Nutrition Where You Need it Most

This improved formula not only has the glucosamine and chondroitin to ease joint discomfort, but additional blends have been added to reduce inflammation and pain. This formula also includes an enzyme blend for better absorption and digestive support. Joint support just keeps getting better!

- Eases joint discomfort
- Promotes rebuilding of joints and cartilage
- Reduces inflammation and pain
- Formulated with enzymes for optimal absorption
- Derived from natural sources
- Aids indigestion

"I feel better after being on my feet for several hours, and I don't have the joint stiffness like I had in the past. I am very impressed with this product."

National Director Don Benson, MO
