

# FEAST® MICRO MASTER®

COMPLEXED MICRONUTRIENT

Boron plays a key function in plant cell wall formation, and relocation of energy into actively growing plant structures.

- Complexed in a form readily available to plants
- Can be soil or foliar applied

# 4-0-0

GUAKANTEED ANALYSIS:
Total Nitrogen (N)
4.0% Water Soluble Nitrogen
Boron (B)
Derived from Monoethanolamine and Boric Acid
Weight per gallon at 68° F

Superior quality ideal for banded and

foliar applied liquid fertilizers

Compatible with most pesticides

### Florida license #F048

**DIRECTIONS:** Add the proper amount of Feast® Boron solution to the spray tank when it is approximately one-third full of water. Finish filling with water and add other chemicals, if any. (Always test for chemical compatibility prior to large-scale mixing.)

### APPLICATION GUIDE:

SOIL: One to eight quarts per acre as needed.\* Feast® Boron can be applied alone, with fertilizers or in combination with most pesticides. For most effective treatment, apply in a deep-placement band at planting or as a sidedress shortly after.

NOTE: DO NOT apply boron in direct contact with the seed.

FOLIAR: One pint to two quarts per acre. When applied with ground application equipment use no more than 10 gallons of total spray solution per acre. When applied with aerial application equipment use no more than 5 gallons per acre of total spray solution. A quality wetting agent such as Rain-Fast® may be used to insure even coverage. NOTE: If label directions are not followed for foliar application, phytotoxicity may occur. Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops.

Wisconsin Users: Refer to supplemental sheets identifying state crops that have a medium to high boron demand, and Wisconsin appropriate application rates.

\*Optimal rates can vary depending on soil conditions, extent of deficiency, type of crop and other factors. Conklin Company Inc. recommends the use of AgroVantage® soil and/or plant tissue analysis to accurately determine the quantities of any nutrient to be applied.

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.html

WARNING: SOME CROPS MAY BE INJURED BY APPLICATION OF BORON.

## Harmful if swallowed or inhaled. Causes eye and skin irritation.

**PRECAUTIONS:** Avoid breathing mist, vapors and spray. Use only outdoors or in a well ventilated area. Do not eat, drink or smoke when using this product. Wear gloves, safety glasses or goggles, and long-sleeved clothing when handling. Wash hands thoroughly after handling.

**RESPONSE/FIRST AID:** If in eyes: rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice or attention. If swallowed: call a physician or Poison Control Center if you feel unwell. Rinse mouth. If on skin: wash with plenty of soap and water. If skin irritation occurs: get medical advice or attention. Immediately take off all contaminated clothing and wash it before reuse. If inhaled: remove person to fresh air and keep comfortable for breathing. For US Health Hazard Information, call 1-888-786-0974.

**STORAGE AND DISPOSAL:** DO NOT reuse container. Triple rinse container prior to recycling or disposal. Keep spills from waterways and sewers.

### KEEP FROM FREEZING

**NOTICE:** This product is intended to be used to correct boron deficiency in crops.
