preWash™ Laundry Prespotter Spray Specification Sheet

Typical treatments use chemicals, harsh solvents, or bleach to treat stains. preWash removes laundry stains with d-Limonene, natural orange oil safe for all colorfast fabrics. The worry-free formula also allows you to treat stains up to a week in advance before washing. It also easily treats difficult stains including grease, oil, grape juice, lipstick, and most inks on colorfast fabrics. preWash is highly effective in all water temperatures and leaves behind a fresh, clean scent.

Recommended For

preWash is safe for all colorfast, washable fabrics.

Directions for Use

Spray preWash on stained area, rub lightly, and let penetrate for up to five minutes. Machine wash as normal. If stain has not been eliminated, treat and wash again before drying. Test for colorfastness in an inconspicuous area before using preWash.
