

## AgroVantage Soil and Tissue Data Base Permission Form

Conklin Company, Inc. allows Independent Business Owners (IBO's) to share their Soil and Tissue data with other IBO's by completing this form. Sharing data with other IBO's removes security steps that are in place to keep an IBO's soil and tissue data from being accessed by users other than the owner of the data.

Any permission given to another IBO releases **ALL** data (soil or tissue tests and any change crops requests) currently on file including all historical data maintained by Conklin.

### Establish Shared Data Links

**Co-Ownership Access.** Co-Ownership Access allows IBO's who are viewing shared data to view all recommendations, soil analysis, pdf's, change crops/yield goal function and the ability to delete changed crop records. Original Midwest test results cannot be deleted. This access gives the IBO viewing shared data the same privileges of the owner of the data. A signature is required to release this level of shared access.

Name: \_\_\_\_\_ Conklin ID#: \_\_\_\_\_

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

---

Place an X in the box to indicate which test data that will be shared. (Please choose only one.)

Soil Test Data Only.     Plant Tissue Data Only.     Both Soil and Tissue Data.

I give the following permission to access **ALL** Midwest Laboratories soil and/or tissue testing analytical data and AgroVantage System Recommendations available under my Conklin ID for the following Conklin Independent Business Owners.

The following have permission to access my data:

Name	Conklin ID#
1. _____	_____
2. _____	_____
3. _____	_____
4. _____	_____
5. _____	_____
