Pro-Serve[®]

Forage Treatment

DESCRIPTION

Liquid Pro-Serve preserves your hay, allowing you to bale it at higher moisture levels and reduce the risks of spoilage. Pro-Serve can be applied at the swather, haybine or baier.

PERFORMANCE CHARACTERISTICS

- Retains more nutrients
- Reduces storage losses
- Lowers protein loss
- Better palatability
- Improves relative feed value (RFV)

PRODUCT CHARACTERISTICS

- Easy to use
- Non-corrosive
- Extended shelf life

DIRECTIONS FOR USE

Mix one gallon Pro-Serve with 24 gallons water and apply one quart of this solution per ton. Spray Pro-Serve evenly, diluted as needed to deliver the proper rate of 1.3 ounces per ton.

SPECIFICATIONS

Part number

41498	Gallon
41499	4-gallon case

Guaranteed analysis:

Crude protein, not less than	3.5%
Crude fat, not less than	0.19%
Crude fiber, not more than	0.20%
Non-viable Lactobacillus, not less than	7.4 x 10 ⁹ /oz.
Moisture, not more than	66.0%
Lactic acid	11.0%
Ash, not more than	5.0%

Weight/U.S. gallon

9.6 pounds

Appearance

Brown liquid

pH

3.0 - 4.0

Packaging

1-gallon plastic container
 4-gallon case – 1 gallon plastic container (4 per case)

Storage

Store in cool, dry place
