

Specification Sheet

Safe[®]

Radiator Coolant Conditioner

Benefits

- Prevents rust and corrosion
- Keeps coolant systems clean
- Reduces system foaming
- Works with all standard antifreeze

Description

Safe's advanced technology works with supplemental coolant additives to provide additional electrolytic corrosion protection in diesel engines. Safe also provides excellent corrosion protection in gasoline engines and is compatible with all metal and plastic coolant system parts. Safe contains seal conditioning agents that keep seals from deteriorating. Safe will help keep your entire coolant system performing efficiently and problem free.

Performance. Value. Longevity.

Applications

Safe can be used in any vehicle or equipment that has a cooling system. Safe can be used to improve the performance of all conventional coolants. Safe keeps your cooling system clean and efficient.

Directions

Use two ounces per gallon of coolant/water mix every six months.

Part Numbers

# 2345	single pint
# 2337	12 pint/cs.
# 2352	single gallon
# 2360	4 gallon/cs.
