Put Kip Cullers to Work on Your Farm!

Kip Cullers' Nutrient Compass Foliar Fertilizer[®] is now available to increase your yields and profits. After three years of test marketing and many years of research, Conklin is pleased to introduce the Kip Cullers' Nutrient Compass Foliar Fertilizer to the ag market. Developed by world-record soybean producer Kip Cullers, test market results indicate that this product:

- Is easily incorporated into most herbicide applications
- Stimulates plants at critical growth stages
- Enhances photosynthesis, resulting in darker green plants
- Produces larger leaves
- Results in greater yields, 4-8 or more bushel increases
- Develops higher test weights

For corn, soybeans, dry beans, cotton, small grains (wheat, rice, etc.) and alfalfa.

Call your Conklin Independent Distributor for further details and make Kip Cullers' Nutrient Compass Foliar Fertilizer part of your crop management plan!
