

## **Benefits**

- Provides excellent anti-wear properties
- Increases resistance to oxidation
- Improves thermal stability
- · Provides anti-corrosion protection
- Extends the life and durability of hydraulic fluids

## **Description**

Enduro maximizes the performance properties of hydraulic fluids. It fortifies the properties necessary for hydraulic systems to operate cool, efficiently, and trouble free longer. Enduro protects system components against wear, corrosion and the harmful effects of oxidation. It also provides additives that improve hydraulic fluids ability to handle water contamination. Enduro's balanced additive package will extend the life of any hydraulic fluid.

## **Applications**

Enduro is compatible with all anti-wear hydraulic fluids and other lubricants used in hydraulic systems.

Add 1oz of Enduro to every 2 gallons of hydraulic fluid.

## **Part Numbers**

#3764 single quart

#3772 6 quart/cs.
