

## 2014 AgroVantage Plot Results

Location: Glade Springs, VA

Corn Test Plot

### Amplify<sup>®</sup>-D Seed Treatment

	Control	Amplify-D
Plant stand count, plants per acre	27,562	27,945
Yield, BPA	272	286
Moisture %	22.1%	23.3%
Yield Advantage compared to control		+ 14 BPA

Amplify-D is a seed treatment that will give almost 3 times the amount of energy to the seed. In this case it was almost 400 more plants per acre and even more important a uniform seed emergence that gave an incredible 14 BPA increase! This is low hanging fruit, for a very small cost per acre, which you can't afford to be without!
