

CONKLIN® FASTRACK®

Equine Gel Ultra

Fastrack Equine Gel Ultra is a source of lactic acid-producing bacteria, yeast culture, dried chicory root, vitamins, and specialized proteins. Supplement Equine Gel Ultra at birth and weaning to promote a healthy digestive tract and strong immune system. Fastrack Equine Gel Ultra should also be used following antibiotic therapy and surgery, and during transportation.

SUGGESTED USE: Place gel between lower teeth and cheek at the following rates:

Foals: 1 - 2 mL per foal at birth, days 3 and 5, weaning, and periods of irregular feed intake

Adult Horses: 1 - 4 mL per horse at worming, transporting, and periods of irregular feed intake

MINIMUM GUARANTEED ANALYSIS

Per 1 mL

Total lactic acid-producing bacteria activity: 1.25 billion colony-forming units (CFUs) of lactic acid-producing bacteria (*Enterococcus faecium* and *Lactobacillus acidophilus*); 400 million CFUs *Bacillus subtilis*; 25 million CFUs yeast cells (*Saccharomyces cerevisiae*); 10,000 IU vitamin A and 25 IU vitamin E.

INGREDIENTS: Vegetable oil, dried egg product, hydrolyzed yeast, dl-alpha tocopheryl acetate (source of vitamin E activity), dried *Enterococcus faecium* fermentation product, sucrose, lecithin, silicon dioxide, vitamin A acetate, dried chicory root, active dry yeast (*Saccharomyces cerevisiae*), dried *Lactobacillus acidophilus* fermentation product, and dried *Bacillus subtilis* fermentation product.

Keep cool. For extended shelf life, store in refrigerator.
